

Installation diagram

- The wooden parts, which are 30 cm long, are connected to each other in a plus shape through the hole in the center using a screw of suitable size.
- The parts are screwed together from the bottom using screws passing through the lower section, and tightened until fully secured.
- The dress hanger is attached to the metal pipes through the hole at the end of the pipes using the small wooden screws included in the package. The wooden parts of the hanger are screwed onto each side separately.
- The dress hanger is screwed in the same level on the upper part of our clothes hangers.
- "The pipe connection screws on the wooden parts in the plus shape are tightened.

"Our hanger is now ready for use. We hope you enjoy using it.
